Title: The End of Ethical Hacking

**August 19th 2005, Singapore, "Air Raid" an event by ThinkSECURE Pte Ltd an ISECOM training partner.**

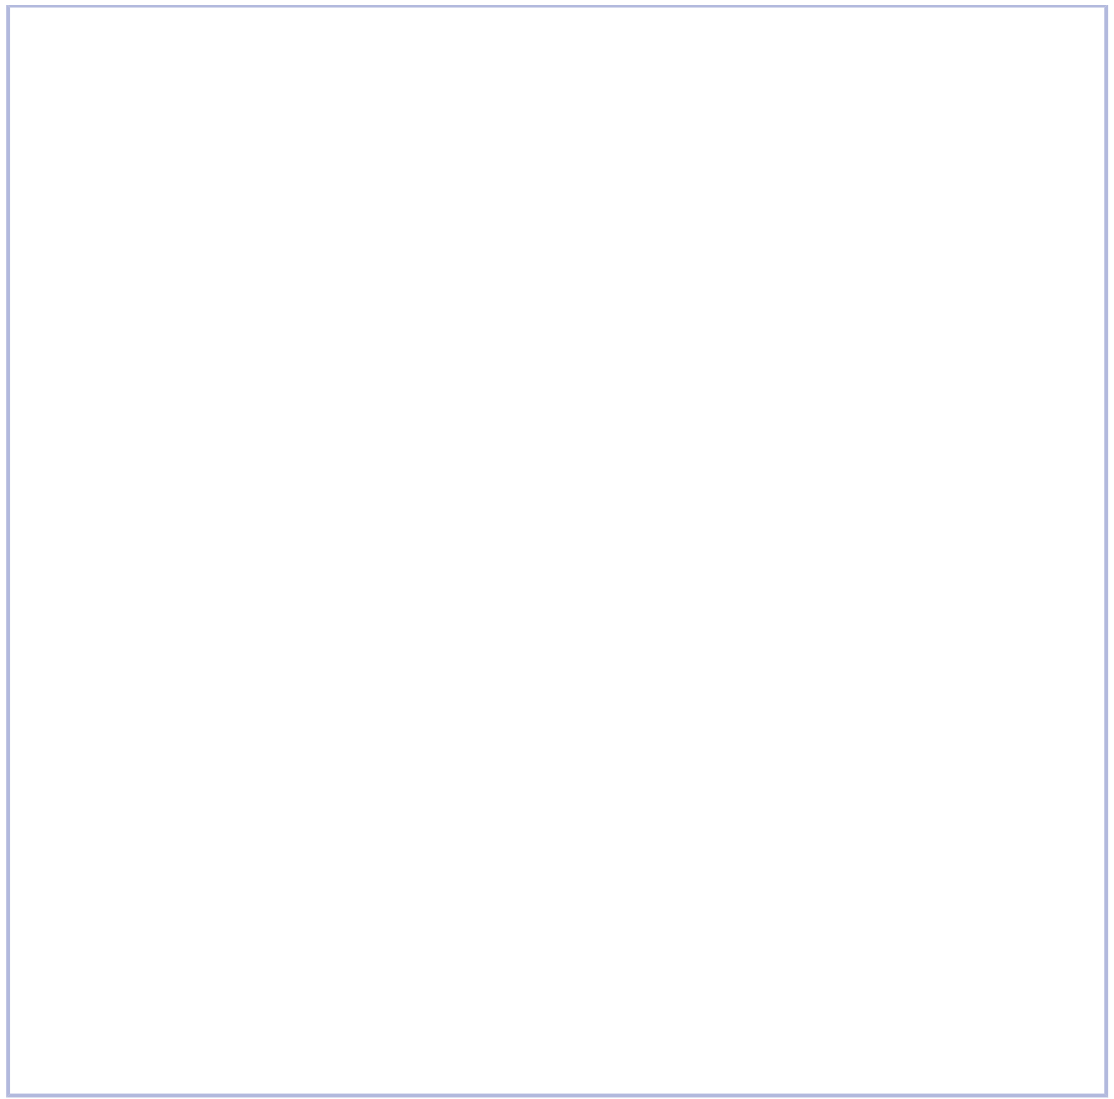

Suntec International Convention & Exhibition Centre  
Room 306, 3rd Floor  
Republic of Singapore  
Official Event Website: <http://airraid.securitystartshere.net>

Event Description

Wireless networks using 802.11 and Bluetooth have become common deployments in today's corporate environments.

To underscore the importance of securing these newer types of networks on top of traditional wired networks, ThinkSECURE Pte Ltd ([www.securitystartshere.net](http://www.securitystartshere.net)), whose founders Christopher Low & Julian Ho designed and implemented the BlackOPS hacking event at Suntec Convention Center last year, has put together AIRRAID, a first-of-its-kind in Asia, if not the world, wireless hacking event\*\*, to provide security professionals and grayhats alike with a real-world wireless penetration contest.
